

Protest against Bush's visit to England

Smash the bloody plans of bush and Blair, The murders of the people of the world!

From the 18th to 21st of November 03, Bush will visit England. Bush's visit to England is in fact the bloody banquet of imperialists for further massacre of people in the Middle East and other parts of the world. The aggressive wars that the US and British Imperialism started from Afghanistan and continued in Iraq are in fact wars for changing the structure of the world and replacing reactionary regimes in region with puppet ones in the middle east.

These wars of aggression are against all people in the world- but women are the front line victims. Bush and Blair roar daily that the wars they are waging in Afghanistan and Iraq are for Freedom and democracy. Today the majority of the world doesn't believe their lies anymore due to the fact that they themselves are victims of these crimes.

Lets look at Afghanistan after their war of aggression, which was supposed to bring freedom and democracy for people of Afghanistan and in particular women. What in fact is happening is that they are sucking the blood of the people even in a more barbaric way. For example, after coming to power of puppet Karzai's regime, and with the presence of US and British forces, agriculture has been destroyed even more and opium production have increased, for a simple reason that it brings more profit for the capitalists. At the end of Taliban rule opium production was at 185 tonnes in a year, but in 2003, under the boots of US, British, German and Dutch soldiers, it raised to an alarming 4600 tonnes and it's estimated to rise to 5500 tones next year.

People of Iraq are teaching good lesson to the occupying imperialist crimes of US and Britain. Despite news blockade in western media, we can still hear the voice of struggle of the Iraqi people. Although occupying forces in revenge of the massacre people of Takrit and Fluja, but still people with their struggle show their deep hate against these world vampire armies. People of Iraq are not going to rest till these occupying forces are thrown out of their land.

Progressive and freedom loving people in Britain are preparing themselves for a mass protest against world's number one criminal. It is not surprising that Blair and the British government are undertaking the biggest security policy since world war two.

There is a kind of martial law in London during Bush's stay, because they know how people, in particular youths, have deep hate with regard to the occupation of Afghanistan and Iraq by US and British imperialism.

Fourteen thousand police officers and security forces surrounding Bush and Blair, is itself living proof of the deep hate of people of their country against the murderers of people of Afghanistan and Iraq.

It is estimated that hundreds of thousands will take part in these protests. These protests prove that people of the world have the same fate, because they face the same brutal system and order, they have a common enemy which must be destroyed by the struggles and revolutions all over the world.

Women are the first-victims of this system and for the same reason are at the forefront of the struggles against it. This capitalist system brought nothing but poverty, unemployment, and sexual slavery and... for women. Now on the eve of the murderer of the people of the world visit to London, we must take part in large numbers in those mass protests. We must show that we have deep hate of these murderers and through that strengthen the unity and solidarity of the oppressed of the world.
